STRENGTH

Our reasearch, since it can help us have a easier way on how to do this progress

AREAS FOR DEVELOPMENT

We didn't do the actual code yet so we don't know what to develop so far. But if I had to think of one, it would be the lack of knowledge and application.

STRATEGY FOR SUCCESS

Having to understand the reasearch so that when we start the actual code, our knowledge that we understand would help us to succeed in the final code.
